DRY FOOD

FRAGILE CHOCOLATES

Challenges

Exclusive expensive chocolates need the best and most accurate weighing solutions available. Candies with chocolate coating or another coating should not have coating-cracks when presented in the retail packaging.

Solution

Customized Multihead Candy Packaging Solutions from Bilwinco features new high-precision direct weighing technology, which ensures you the lowest give-away on the market. The machine design offers the lowest possible drop heights, ensuring you the gentle and soft handling of your fragile products.

- Integrated soft-drop feature reduces product damages

- Gentle filling of chocolates into cups

High speed chocolate weighing and packaging with extremely low drop heights

DRY FOOD

BAKERY CEREALS

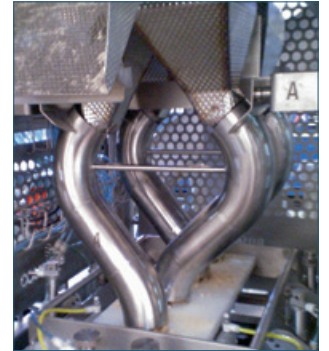

Challenges

New and advanced packaging-styles with special features are constantly being developed and brought on the market. Your delicate products must be displayed in a unique way, making your products look better than others.

Solution

Bilwinco knows that no two customers are alike, and Bilwinco has been a specialist in unique Packaging Systems, tailored for your specific requirements since before anyone else in this business. Accurate, gentle and special handling of your products is key in every Bilwinco line, and Bilwinco controls this process to perfection.

- Dual line for buns bagging. Some dry bakery products leave a build-up over time and needs a product zone wash-down option.

- Custom loading system for cereals

DRY FOOD

SNACKS CANDIES

Challenges

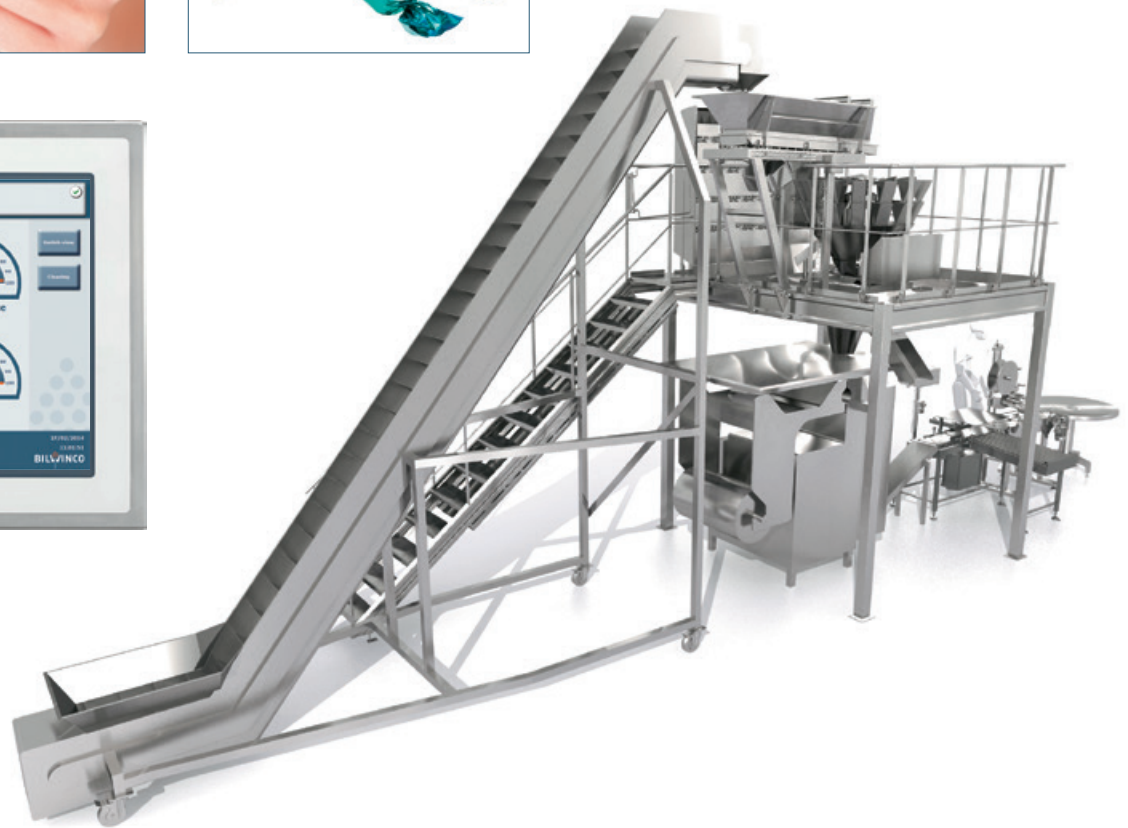

Small volumes requires small simple solutions and high volume productions requires efficient high volume lines 24/7.

Solution

Bilwinco supplies solutions to both ends of this industry. Where volume is the only way for you to make profit, Bilwinco offers the largest scale solutions available – and where smaller volumes are required, Bilwinco offers the smallest multihead scale solutions available as well. In other words, we cover the full range.

Keep an eye on the production efficiency, even from a distance. The Bilwinco HMI also displays online production data and packaging line OEE figures.

DRY FOOD

DRY PASTA
PHARMA
PETFOOD
AGRO

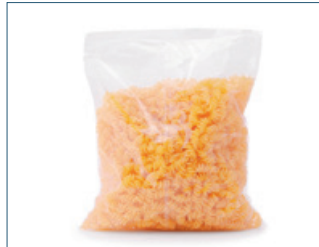

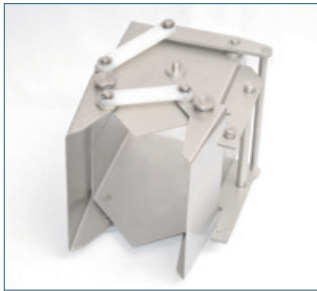

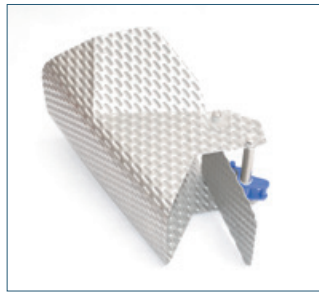

Challenges

Each product is unique in itself and requires packaging knowhow and weighing experience. Some products requires weighing buckets with double gates, some will do best with a single gate while others are handled best by buckets with a sliding gate principle.

Solution

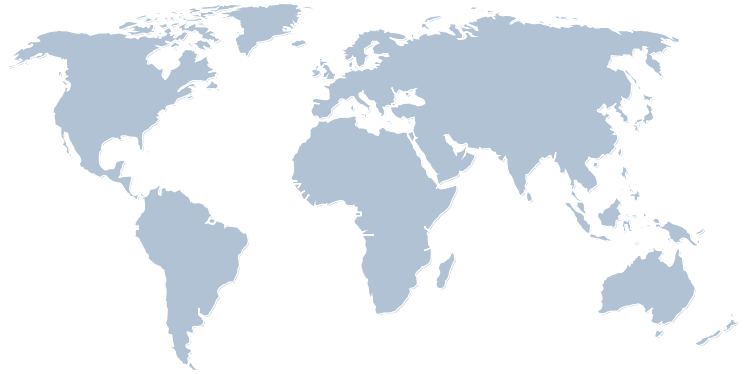

Bilwinco multiheads can be equipped and dressed to the job – and we know how.

DRY FOOD

INDUSTRY

Bilwinco has been a market leader in the weighing and packaging industry since 1955. At our company headquarters in Hjoerring, Denmark, we develop and build individual solutions for our customers worldwide.
